## 7100 SERIES

### Information

- 100% HS shaft (High Strength Carbon Fiber).
- YQR 1 grip.
- YQR 2 strap.
- YXB 2 basket.
- Free shaft (Equipped with a kit strap, grip and glue).

## 6700 SERIES

### Information

- 70 % HS shaft (High Strength Carbon Fiber)
- YQR 1 grip
- YQR 2 strap
- YXB 2 basket
- Free shaft (Equipped with a kit strap, grip and glue)

## 5400 SERIES

### Information

- 40 % HS shaft (High Strength Carbon Fiber)
- YQR 1 grip
- YQR 2 strap
- YXB 2 basket

## 9100 SERIES

For skiers looking for top level performance we recommend our 9100 Series poles which have shafts built using 100 % CNT High Modulus carbon fiber reinforced with nano particles ensuring extreme stiffness, low weight and the best possible balance and great swing for the most demanding skiers.

### Technical Information

- YXG 1 grip
- YXS 1 strap
- YXB 1 Racing basket
- Free shaft (equipped with a kit strap, grip and glue)

---

## 8100 SERIES

High-level / active skiers, we recommend our 8100 series poles which have shafts built using a carbon fiber that ensures high stiffness properties (High Modulus Carbon Fiber) light weight, stiffness and balance that are optimal in our 8100 series composite shafts.

### Technical information

- 100 % HM shaft (High Modulus Carbon Fiber)
- YXG 1 grip
- YXS 1 strap
- YXB 1 basket
- Free shaft (Equipped with a kit strap, grip and glue)
